

BROMAX BLOCK

rev.3 of 25/06/2020

READY-FOR-USE BROMADIOLONE-BASED RODENTICIDE BAIT IN WAXED BLOCK - FOR PROFESSIONAL USE -

COMPOSITION

Pure Bromadiolone (no. CAS 28772-56-7)	gr. 0,005
Denatonium Benzoate (no. CAS 3734-33-6)	gr. 0,001
Calcium hydroxide (no. CAS 1305-62-0)	gr. 0,375
Palatable substances and co-formulants	quantum satis for gr. 100

CHARACTERISTICS

BROMAX BLOCK is a rodenticide bait with at its base the anticoagulant active substance known as Bromadiolone, which is effective against House Mouse (*Mus musculus*), Grey Rat (*Rattus norvegicus*), and Black Rat (*Rattus rattus*) even after a single ingestion. **BROMAX BLOCK** contains a bitter substance aimed at preventing children from swallowing it accidentally.

BROMAX BLOCK for professional use can be used inside and around industrial buildings (including goods warehouses and ship holds), rural and civil buildings, houses, basements, garages, storerooms, and relevant gardens or external areas.

DOSES AND MODES OF USE

The product is ready for use and must be employed in accordance with the doses below. Avoid touching the product with bare hands and use appropriate gloves. The rodenticide bait must be inserted in an appropriate container, protected against atmospheric agents, the ingestion by non-target species and the dispersion into the environment. Observe the infested area and put bait containers at burrows, along rodents' paths, and in the places where they are mostly present. Containers must be placed at a distance from one another of about 5-10 m.

Recommended doses are:

House Mouse: 2 baits (40 g) x 100 square metres

Grey Rat: 3-5 baits (60-100 g) x 100 square metres

Black Rat: 3-5 baits (60-100 g) x 100 square metres

Mark adequately the area involved in the treatment by indicating the risk of poisoning and the measures of first aid. Replace the baits in the containers every week, if necessary. Remove dead animals as soon as possible and eliminate them according to the regulations provided for. The product is not destined to a permanent use, arrange for treatments lasting 6 weeks at the maximum. At the end of the treatment, take away the containers and eliminate the remaining baits according to regulations in force. Read carefully the safety data sheet.

LABELLING

HAZARD STATEMENTS

H360D May damage the unborn child. **H372** Causes damage to organs (BLOOD) through prolonged or repeated exposure.

PRECAUTIONARY STATEMENTS

P102 Keep out of reach of children. **P202** Do not handle until all safety precautions have been read and understood. **P270** Do not eat, drink or smoke when using this product. **P280** Wear protective gloves. **P308 + P313** IF exposed or concerned, get medical advice. **P501** Dispose of contents and containers as hazardous and special waste according to national regulations.
