

INSECTICIDE

CIPRAL

Rev. 1 of 13/12/2019

READY-FOR-USE INSECTICIDE FOR DOMESTIC USE

Product in water formulation, specifically designed to be used with a hand sprayer against cockroaches, ants, mosquitoes (including Asian tiger mosquito), flies, bedbugs, and fleas present in environments frequented by pets.

COMPOSITION

Prallethrin	gr. 0.11
Ciphenothrin	gr. 0.21
Allowed coadjuvants and solvents quantum satis for	gr. 100

CHARACTERISTICS

CIPRAL is an insecticide effective against cockroaches, ants, flies, mosquitoes (including Asian tiger mosquito), fleas present in environments frequented by pets and bedbugs, characterised by a fast killing effect and a good residual activity.

The application of the product stimulates the escape of crawling insects from their shelters, leading to a fast killing.

DOSES AND MODES OF USE.

Shake well the container-dispenser before use. Keep the container-dispenser in vertical position when using.

Against Cockroaches, ants, bedbugs, and fleas present in environments frequented by pets:

To apply the product, operate the hand sprayer by directing the jet from a distance of about 20-25 cm on the surfaces frequented by insects and in chinks and cracks, along the edges of the floor, on skirting boards, behind furniture, household electrical appliances, in door and window frames, under the sinks and along the pipes, where they may place in a nest. In particular for fleas, we recommend to treat the places where pets usually stay.

Distribute 25-30 ml of product for m², bearing in mind that every spray output allows to distribute about 1 ml of product. Treated surfaces may keep a residual effectiveness up to 4 weeks.

This duration can be reduced due to the presence of dust, grease, and dirt on treated surface.

Against mosquitoes (including Asian tiger mosquito), flies:

In premises of normal dimensions, distribute 25-30 ml of product by directing the jet in the air and bearing in mind that every spray output allows to distribute about 1 ml of product.

LABELLING

HAZARD STATEMENTS: Very toxic to aquatic life with long lasting effects.
