

INSECTICIDE

RESET

Rev. 1 of 10/06/2020

**READY-FOR-USE CYPERMETHRIN-BASED INSECTICIDE-ACARICIDE
FOR THE CONTROL OF FLYING AND CRAWLING INSECTS
- DOMESTIC AND CIVIL USE -**

COMPOSITION

Pure Cypermethrin (cis/trans:40/60)
Co-formulants and water

gr. 0.25
quantum satis for gr. 100

CHARACTERISTICS

RESET is a ready-for-use water-based insecticide-acaricide containing Cypermethrin, which acts by contact and ingestion. The product has a broad-spectrum action and a rapid control of target insects (flying insects, crawling insects, and ticks) in every stage of development, with a triple action: flushing out, killing, and residual action.

RESET is formulated in water microemulsion, is devoid of gas, inodorous and it does not stain. The active substance is processed so as to make the formulation more stable and guarantee a fast, complete, and stable insecticide activity of the product after application.

FIELDS OF USE

RESET is suitable for insecticide treatments of indoor and outdoor environments, such as community places (such as urban areas, offices, canteens, hotels, restaurants, theatres, kitchens, camping, tourist resorts, public buildings, such as hospitals, schools, clinics, and barracks), housing areas (such as flats, houses, kitchens, roofs), production areas (food industries, storehouses, warehouses, canteens, restaurants), zootechnical areas (breeding farms, manure yards, animal shelters, stables, kennels) composting plants, landfills, purifying plants, sewers, manholes, ship holds, railway carriages, means for the transport of people, animals or goods.

To fight against mosquitoes (including Asian tiger mosquito) **RESET** can be used in green areas, such as hedges, gardens, tree-lined avenues, ornamental bushes, and turfs.

Controlled insects: Flying insects, crawling insects, and ticks.

Instructions for use**SHAKE BEFORE USE.**

RESET eliminates the insects that lean on treated surfaces, for example walls, hedges, floors, skirting boards, shutters, curtains, near cracks, chinks, and corners, etc. The product must be sprayed directly on the surfaces to be treated from a distance of about 40–50 cm, preferably in the least hot hours of the day, avoiding the full sun. Avoid dripping and limit the application strictly to the infested area. After use, let it dry.

RESET is suitable for treatments of sensitive areas with hot and cold sprayers: ULV-sprayers, low-pressure pumps, backpack pumps, atomizers, and thermal smoke generators.

Recommended doses

- Against flying insects: 100 ml/15 m² of surface;
- Against crawling insects: 100 ml/12.5 m² of surface;
- Against ticks: 100 ml/6,5 m² of surface.
- Treatments with thermal smoke generators (for professional use): 1 litre/1,500 m³.
- Outdoor treatment with atomizers (for professional use): 1 litre/1,500 m³.

LABELLING

HAZARD INDICATIONS: H410 Highly toxic to aquatic life with long-lasting effects.
