

INSECTICIDE

RETHRIN

Rev. 2 of 06/04/2020

**INSECTICIDE-ACARICIDE IN WATER MICROEMULSION
READY FOR USE
FOR FLYING AND CRAWLING INSECTS**

COMPOSITION

Pure Permethrin	gr. 0.3
Pure Tetramethrin	gr. 0.3
Pure Piperonyl Butoxide	gr. 1
Formulants and water	q.s. to gr. 100

FEATURES

RETHRIN is a ready for use insecticide in water microemulsion which acts by contact and ingestion with a strong destroyed action and medium persistence. The formulation is effective against all insects in cold blood.

RETHRIN contains no gas propellants.

RETHRIN is indicated for use in homes and civilians, such as hospitals, schools, food manufacturers, hotels, restaurants, stores. Use only for mosquitoes is also allowed for treatment in green areas, bushes and hedges, lawns.

RETHRIN is effective against a wide range of flying insects including flies (*Musca domestica*), mosquito (*Aedes albopictus* and *Culex pipiens*), wasps (*Vespula spp.*), horseflies, sandflies, including chironomids and crawling cockroaches (*Blatta orientalis*), ants (*Lasius spp.*), bedbugs, cockroaches, silverfish, earwigs.

DOSES AND USE

RETHRIN not stain and is atomized as it is known where the presence of insects, along the door frames, floors, around the animal shelters, on the walls, in corners, crevices, and under mosquito nets sinks.
